OFFICIAL FACTORY MANUAL • NOVEMBER 2026

Complete Operational & Financial Handbook

The Mobile-First Operating System for Nigerian Dual-Line Water Plants

> **Core Promise to Mr. Obi:** Know your exact net cash profit from both your Sachet Line and Bottled Water Line before 8:00 PM every evening. Stop driver theft with physical evidence, eliminate ghost shifts, and monitor diesel consumption down to the kobo.

1. Dual-Line Plant Economics: Sachet vs. Bottled Water

Nigerian water factories cannot rely on sachet water alone. Running a dual-line plant changes your factory revenue model completely:

Production Line	Product Unit	Selling Price	Profit Margin / Unit	Primary Money Leak / Fraud Risk
Line 1: Sachet Pure Water	Bag of 20 Sachets	₦350 wholesale	₦25 – ₦40 per bag	Drivers claiming road bursts without returning physical pouches; unrecorded machine rolls.
Line 2: 75cl Bottled Water	Pack of 12 Bottles	₦1,200 wholesale	₦220 – ₦320 per pack	PET preform blow rejects stolen or sold; stolen 28mm caps and labels.
Line 2: 50cl Bottled Water	Pack of 20 Bottles	₦1,100 wholesale	₦200 – ₦280 per pack	Blow molding heat defects; unrecorded gate sales by cashiers.
Line 2: 19L Dispenser Jars	19-Liter Refill	₦900 refill	₦450 – ₦600 per refill	**Unreturned empty jars!** Jars cost ₦4,500 each. Unreturned jars destroy 5 trips of profit.

2. Today's Dual-Line Daily Financial Audit (Sample Full Shift)

Below is the mathematical breakdown of a standard full-capacity day in Mr. Obi's plant:

Revenue Source	Units Produced & Dispatched	Unit Price	Gross Revenue
Sachet Water Line	4,200 Bags (14 Nylon Rolls used)	₦350 / bag	₦1,470,000
75cl Bottled Water Line	200 Shrink Packs (12s)	₦1,200 / pack	₦240,000
50cl Bottled Water Line	150 Shrink Packs (20s)	₦1,100 / pack	₦165,000
19L Dispenser Jar Refills	106 Jars (Dispenser line)	₦900 / refill	₦96,000
TOTAL TODAY'S GROSS FACTORY REVENUE			**₦1,971,000**

Direct Production & Operating Expenses

- **Generator Diesel Overhead:** 32 Liters @ ₦1,350/L = **₦43,200** (Sachet energy overhead = ₦8.20/bag).
- **Sachet Nylon Film:** 14 Rolls (280 kg LDPE) = **₦280,000**.
- **PET Preforms & Caps:** 5,400 units + 24 blow rejects = **₦95,600**.
- **Shrink Wrap Film & Labels:** 350 packs = **₦28,000**.
- **Factory Loaders & Packers Wages:** ₦50,000.
- **Driver Commissions & Fuel Allowance:** ₦50,000.

> 💰 **TODAY'S NET CASH PROFIT: ₦524,200**
> Physical Cash in Blessing's Drawer: ₦420,000 • Moniepoint POS Verified Transfers: ₦1,551,000.

3. The 4 Zero-Password Staff Roles

Factory workers do not use emails or passwords. They tap their picture card and enter a 4-digit PIN:

👑 Mr. Obi (Owner / MD)

PIN: 2026

Access from phone home screen. See net cash profit, driver short debits, diesel cost per bag, and 1-tap WhatsApp evening digest.

📋 Kenneth (Supervisor)

PIN: 1111

Taps "+1 Roll Used" for sachets, logs bottle preforms and blow rejects, tracks diesel dips, and dispatches WhatsApp shift close.

💰 Blessing (Gate Cashier)

PIN: 2222

Selects product (Sachets, 75cl, 50cl, Jars) and tags Cash vs. Bank Transfer. Verifies Moniepoint POS credit before unlocking gate.

🚚 Musa (Route Driver)

PIN: 3333

Inspects loaded truck manifest, delivers to depots, returns burst plastic pouches, and collects ₦4,500 deposit for unreturned 19L jars.

4. The Two Fraud Prevention Rules That Protect Your Capital

Rule 1: The Sachet Burst Pouch Rule (Stopping Driver Theft)

> **The Law of Physical Pouches:** If a driver claims 40 bags burst on road potholes, he must return **40 physical burst pouches** to Kenneth at the gate. If he returns 0 pouches, the system auto-debits the full ₦14,000 from his pay.

Drivers can no longer sell 40 bags into roadside kiosks, pocket ₦14,000, and claim "water burst on Badore bridge". Zero pouches = 100% driver debt.

Rule 2: The ₦4,500 Dispenser Jar Deposit Rule

> **Protecting 19L Dispenser Jars:** An empty 19L jar costs ₦4,500 – ₦6,000. If Musa delivers 15 dispenser refills to a corporate client, he must collect **15 empty jars**. If the client retains the empty jars, Musa must collect a **₦4,500 deposit per jar**.

If Musa leaves 5 jars without collecting empty containers or deposits, his account is flagged for ₦22,500 jar liability. This prevents the quiet loss of ₦100,000+ in jars every month.

5. NAFDAC Laboratory Quality Log (NIS 306:2008 Standard)

Test Parameter	NAFDAC Standard	Obi Factory Safe Range	Status
Total Dissolved Solids (TDS)	< 100 ppm	15 – 45 ppm (Pure Permeate)	✅ Pass (24 ppm)
Water pH Level	6.5 – 7.5	6.8 – 7.4 (Neutral)	✅ Pass (7.2 pH)
UV Sterilizer Lamp Hours	< 8,000 hrs	Active Lamp Lifetime	✅ 2,140 hrs (Safe)
Physical Taste & Clarity	Odorless, Crystal Clear	100% Inspection	✅ Verified Pure

6. Technical Support & Factory Contact
