OBI TABLE WATER OS

Complete Factory Operating Manual & Standard Operating Procedures (SOP)

Certified by Bethelmind Digital Solutions (CAC: Reg 9912717) • Moniepoint MFB: 6805375225 • Hotline: 0802 279 1227

1. EXECUTIVE OVERVIEW

> **Core Promise to Mr. Obi:** Know your factory's exact daily net profit before 8:00 PM every evening, stop driver shortages with the physical pouch rule, audit generator fuel per bag, and protect your plant from NAFDAC fines—all from your mobile phone.

Sachet water is a volume business where margins are ₦15–₦35 per bag. Factories lose money outside the sealing machine: siphoned generator diesel, driver road burst claims, unverified bank transfer alerts, and uncollected distributor debts. This software automates daily reconciliation with **zero emails, zero passwords, and zero monthly Meta API fees**.

2. THE 4 FACTORY ROLES & LOGIN PINS

Role & Staff Name	Security PIN	Daily Responsibility	Interface & Access URL
1. 👔 Managing Director (Mr. Obi)	`2026`	Monitors daily profit, caught driver shortages, diesel burn rate, and NAFDAC purity.	`/factory/owner` (Add to Phone Home Screen)
2. 📋 Shift Supervisor (Kenneth)	`1111`	Taps "+1 Roll Used" (300 bags), logs diesel poured, and sends 8:00 PM WhatsApp close.	`/factory/login` → Kenneth
3. 💰 Gate Cashier (Blessing)	`2222`	Records walk-in sales, verifies Moniepoint POS transfers, and counts drawer cash.	`/factory/login` → Blessing
4. 🚚 Route Driver (Musa / Emeka)	`3333`	Checks loaded bags (700 bags), signs customer waybills, and returns burst pouches.	`/factory/login` → Musa

3. FRAUD PREVENTION & MATHEMATICAL RULES

3.1 Nylon Film Yield Formula (Anti-Ghost Shift)

```
Expected Bags = Nylon Roll Weight (kg) × 16 bags/kg
Example: 14 Rolls × 300 bags = 4,200 bags expected output.
```

If supervisor logs 14 rolls used but records only 3,600 bags without 600 burst pouches in the factory scrap bin, the system flags a **Ghost Shift Alarm** (600 bags missing = ₦210,000 unrecorded sales).

3.2 The Strict Driver "Burst Pouch Rule"

```
Missing Bags = Loaded Bags - (Cash Sold Bags + Credit Bags + Physical Pouches Returned)
Driver Auto-Debit = Missing Bags × ₦350 (Full Retail Price)
```

Case Study (Musa - Truck 2):
Loaded: 700 bags. Cash returned: 620 bags. Musa claimed: "40 bags burst on Badore road potholes".
Proof check: Musa brought back **0 physical pouches**.
Verdict: 40 missing bags × ₦350 = **₦14,000 automatically debited** from Musa's weekly commission.

3.3 Generator Diesel Overhead Slicer

```
Fuel Cost per Bag = (Diesel Liters Burned × Pump Price ₦/L) ÷ Total Bags Packed
Benchmark: Healthy Factory = < ₦12.00/bag • High Alert Warning = > ₦25.00/bag
```

4. NAFDAC WATER QUALITY COMPLIANCE (NIS 306:2008)

Parameter	NAFDAC Standard	Factory Safe Range	Corrective Action
Permeate Treated TDS	< 100 ppm	15 – 45 ppm	Replace 1-micron sediment filters or RO membranes.
Water pH Level	6.5 – 7.5	6.8 – 7.4 (Neutral)	Backwash activated carbon & calibrate mineraliser.
UV Sterilizer Lamp	< 8,000 hrs	Active digital counter	Replace bulb once counter passes 7,500 operating hours.

5. 8:00 PM AUTOMATED WHATSAPP EVENING CLOSE

> **Supervisor 1-Tap Send:** At 6:00 PM, Kenneth taps *"Send Shift Close to Mr. Obi on WhatsApp"*. The system opens WhatsApp with the complete Daily P&L digest already typed out. Zero API setup, zero token maintenance, zero monthly WhatsApp charges.

6. HOW TO ADD TO PHONE HOME SCREEN (PWA ICON)

- **On Android (Chrome):** Open `https://www.bethelmindanalytics.com/factory/owner` → Tap browser menu (⋮) → Select **"Add to Home screen"** → Tap Add.
- **On iPhone (Safari):** Open link → Tap Share (square with arrow) → Tap **"Add to Home Screen"**.

The "Obi Water" app icon will sit directly on your phone home screen beside WhatsApp.
